**I have had artistic influence throughout my education due to years of experience with a variety of media, ranging from graphic design to fine art. After spending many years practising, I have developed a style which I think is unique and suitable for the concept and design of characters in animation. I am comfortable working in a team to produce work and can communicate effectively when issues arise. I have experience using software such as Photoshop and TV Paint, and with a passion for illustration I am working towards creating a steady skillset for 2D animation. I enjoy watching existing animation, utilising what I've learnt by applying it to my own work.**
